

# Risk Management 1A

*An Entry Level Course for Aspiring Project and Risk Managers*

Overview: Risk Management 1A is a one-day course that provides an introduction to the processes, methodologies, terms, and skills, which are essential for Project and Risk Managers.

The concepts taught in this course are based on those found in the Project Management Institute's Body of Knowledge (PMBOK®). In addition, the course provides information, tools, and techniques in use by Project Management service providers.

The course was derived from the demand that students need a short primer that will help them apply the various Risk Management principles to their work. The presentation has been carefully created using a logical approach and understandable language. The class incorporates lecture, discussion, exercises which allow students to begin using the principles and applying them to a real world case scenario.

Objectives: The course focuses on "introductory" level concepts and approach. Students will gain knowledge and have an understanding of the following:

- What is Risk?
- What is Risk Management?
- What is Risk Planning?
- What are the Risk Management Processes?
- What is a Risk Database?
- What is Risk Communication and Reporting?
- Closing a project
